DETAILED ACTION

I. Applicant's arguments, see paper, filed 6/13/05, with respect to claims have been fully considered and are persuasive. The rejection of claims 41,42,44-71 under 35 USC 103(a) as being obvious over Fischer USPN 5985249 has been withdrawn.

Applicant explains why Fischer is not prior art over the instant invention. See response.

II. Applicant's arguments filed 6/13/05 have been fully considered but they are not persuasive. See argument below.

Applicant argues that Jensen '625 and '370 do not demonstrate the criticality of the instant KNO₃ range from about 0.01 to about 2.0%. Examiner disagrees with Applicant. Examiner argues that both patents employ compositions comprising KNO₃ in the range of about 0.01 to about 2.0%. See examples 7 and 14 in both patents. In addition USPN '370 claims a KNO₃ of at least about 0.1% which amount definitely falls within the instantly claimed amount of about 0.01 to about 2.0%. Examiner agrees with Applicant in that it is fine to consult the body of the specification to gain clarity of the claims in a double patenting rejection. For this reason, the double rejections of claims 41,42,44-87 over USPNs '625 and '370 will be maintained.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1616

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
